IDEAS | CODE | INNOVATION

1. ABOUT OUR COMPANY

Sparklyn Infotech is a dynamic technology engineering and digital transformation venture committed to turning groundbreaking ideas into high-performance web applications, assistive mobile solutions, and enterprise software systems. Founded with a vision to ignite digital progress, we partner with startups, educational academies, retail enterprises, and commercial organizations across India and globally.

We specialize in analyzing real-world operational challenges and developing robust, secure, and user-friendly digital products that streamline business processes, eliminate communication barriers, and drive tangible commercial growth. Combining agile engineering methodologies with creative craftsmanship, we build scalable digital infrastructure tailored to each client's unique operational needs.

2. OUR VISION

To become a globally recognized benchmark in software engineering and digital transformation, empowering enterprises, aspiring students, and everyday individuals through human-centric, reliable, and accessible technological products.

3. OUR MISSION

- Engineer high-performance, responsive web applications and cross-platform mobile apps.
- Build impactful assistive technologies that solve critical everyday societal challenges.
- Empower businesses with seamless inventory control, point-of-sale systems, and automated accounting workflows.
- Deliver real-time competitive examination and assessment portals to accelerate educational aspirants' success.
- Maintain an uncompromising commitment to clean architecture, code quality, data security, and long-term client support.

4. OUR SERVICES

Web Application Development
Custom, scalable web platforms, full-stack portals, client dashboards, and responsive business websites crafted with modern React and Node.js ecosystems.

Mobile Application Development
Cross-platform iOS and Android apps powered by Flutter, featuring fluid UI interactions, offline data synchronization, and camera-based computer vision.

Inventory & ERP Systems
End-to-end stock control, automated invoicing, POS billing, supplier ledger records, and real-time financial tracking for retail and distributors.

Online Examination & EdTech Platforms
Real-time mock test engines, computer-based exam simulators, automated scorecard evaluations, and performance analytics for coaching institutes.

AI & Assistive Intelligence
Real-time gesture recognition, speech-to-sign visual animations, optical character recognition, and machine learning models for everyday accessibility.

UI/UX Design & Maintenance
Intuitive user interface wireframing, high-fidelity Figma prototypes, performance optimization, cloud deployment, and 24/7 technical support.

5. OUR TECHNICAL EXPERTISE

Frontend Technologies:	React.js, Next.js, HTML5, CSS3, TailwindCSS, Bootstrap, JavaScript (ES6+), TypeScript
Backend & APIs:	Node.js, Express.js, Python, FastAPI, RESTful API Architecture, WebSockets
Mobile Development:	Flutter, Dart, Android Native, iOS Cross-Platform, Camera & Hardware Sensor Integration
AI & Computer Vision:	TensorFlow Lite, MediaPipe, OpenCV, Speech-to-Text Recognition, Gesture Analysis
Databases & Storage:	PostgreSQL, MongoDB, MySQL, Firebase Firestore / Realtime DB, Redis
Cloud & DevOps:	Docker, AWS (EC2/S3), DigitalOcean, Git, GitHub Actions, NGINX, CI/CD Pipelines
Design & Testing:	Figma, Postman, Jest, Cypress, Responsive Design, OWASP Security Best Practices

6. OUR TARGET CUSTOMERS & SECTORS

We serve a diverse ecosystem of clients looking for dependable, cost-efficient, and cutting-edge software solutions:

- **Small & Growing Businesses:** Retailers, wholesalers, and service providers requiring streamlined inventory, invoicing, and POS accounting applications.
- **Educational Institutes & Academies:** Coaching centers, government exam preparation institutes, and colleges needing secure mock test and assessment portals.
- **Startups & Product Innovators:** Early-stage founders seeking agile development of Minimum Viable Products (MVPs), assistive applications, and customer-facing mobile apps.
- **Healthcare & Social Initiatives:** Organizations building accessibility aids and assistive communication platforms for hearing-impaired communities.
- **Independent Professionals & SMEs:** Businesses seeking professional digital brand presence and custom workflow automation.

7. OUR FUTURE GOALS

Our strategic roadmap focuses on establishing Sparklyn Infotech as an industry-standard technology partner by:

- Expanding our proprietary SaaS portfolio in inventory management and online assessment technology.
- Advancing research and deployment of on-device AI for accessible communication tools (including regional sign languages).
- Building long-term collaborative partnerships with enterprise businesses and educational bodies across India and overseas.
- Continually investing in state-of-the-art cloud architectures and emerging engineering practices.

8. OUR COMMITMENT

We are firmly committed to client satisfaction, technical excellence, and transparent communication. Every software solution we craft undergoes rigorous quality benchmarking, security reviews, and usability testing. We guarantee timely project delivery, well-documented codebases, and ongoing technical support that empowers

OUR PROJECT PORTFOLIO

Sparklyn Infotech has engineered purposeful software applications spanning assistive mobile AI, enterprise retail management, and online educational test platforms. Below are highlights of our flagship projects:

PROJECT 01: SIGNOVA – SMART SIGN LANGUAGE ASSISTANT MOBILE APP

MOBILE APP & ASSISTIVE AI

Overview: Signova is an innovative, assistive mobile application specially developed for individuals who do not know sign language. It empowers non-signers to seamlessly communicate and bridge conversations with the deaf and hard-of-hearing community in classrooms, workplaces, healthcare clinics, and daily public interactions.

KEY CAPABILITIES & FEATURES:

- ✓ **Two-Way Speech-to-Sign Translation:** Captures spoken speech or typed text and converts it into animated sign language demonstrations in real time.
- ✓ **Real-Time AI Camera Gesture Recognition:** Utilizes mobile computer vision to identify sign language gestures captured by the device camera and translates them into readable text and synthesized speech.
- ✓ **Interactive Learning & Dictionary Module:** Comprehensive categorized dictionary with step-by-step visual tutorials for users to practice and master basic to advanced sign vocabulary.
- ✓ **Emergency Quick Phrases & Offline Mode:** Pre-loaded essential emergency phrases for instant accessibility without requiring continuous internet connectivity.

Technologies & Architecture: Flutter, Dart, TensorFlow Lite, Computer Vision, Python, Firebase Cloud Services.

PROJECT 02: INVENTORY, SALES & ACCOUNTING MANAGEMENT SYSTEM

FULL-STACK WEB APPLICATION

Overview: Developed a comprehensive web-based application to manage inventory, product stock, sales transactions, and accounting operations efficiently. Implemented modern features to streamline business workflows, maintain organized records, and simplify sales and inventory tracking for commercial retail and wholesale businesses.

KEY CAPABILITIES & FEATURES:

- ✓ **Real-Time Stock & Inventory Management:** Tracks stock movements across multi-product catalogs, monitors minimum threshold levels, and provides automatic low-stock notifications.
- ✓ **Fast Point-of-Sale (POS) & Billing:** Generates instant GST-compliant tax invoices, receipts, and order confirmations with integrated barcode lookup and payment tracking.
- ✓ **Automated Double-Entry Accounting & Ledgers:** Automates customer and vendor ledger accounts, tracks outstanding payables and receivables, and generates real-time cash flow summaries.
- ✓ **Financial Reporting & Revenue Analytics:** Interactive dashboard visualizations displaying daily, monthly, and yearly sales graphs, top-selling products, and gross/net profit-and-loss margins.

Technologies & Architecture: React.js, Node.js, Express.js, PostgreSQL Database, TailwindCSS, Chart.js Data Visualization.

PROJECT 03: GOVEXAM TEST PORTAL – ONLINE EXAMINATION PLATFORM

EDTECH WEB APPLICATION

Overview: A full-featured online exam testing website built specifically for government exam preparation aspirants (such as TNPSC, UPSC, SSC, Banking, and RRB). Designed to enable candidates to easily attend timed tests and view their score instantly in an authentic real-exam testing environment.

KEY CAPABILITIES & FEATURES:

- ✓ **Authentic Computer-Based Test (CBT) Interface:** Simulates official government exam UI with subject section switching, countdown timers, and full-screen distraction-free mode.
- ✓ **Interactive Question Palette:** Live status indicators for answered, unanswered, marked for review, and visited questions for optimal time management.
- ✓ **Instant Automated Scorecard & Analytics:** Immediate calculation of total marks, negative mark deductions, accuracy rate, percentile standing, and time spent per question upon submission.
- ✓ **Question-by-Question Solution Keys:** In-depth explanatory answer keys and reference notes to help candidates identify weaknesses and improve test performance.

Technologies & Architecture: React.js, Node.js, Express.js, MongoDB Database, RESTful APIs, TailwindCSS.

OUR PROJECT DEVELOPMENT APPROACH

Every digital solution delivered by Sparklyn Infotech follows an industry-tested, agile lifecycle to guarantee reliability, security, and exceptional user experience:

1. **Discovery**
   Requirement scoping, target audience analysis, and architectural roadmap planning.
2. **UI/UX Design**
   Wireframing, user journey mapping, and interactive high-fidelity prototypes.
3. **Agile Build**
   Modular frontend & backend coding with clean code standards and version control.
4. **QA & Testing**
   Functional, cross-browser, responsive, and stress testing across devices.
5. **Deployment**
   Cloud release, domain configuration, staff training, and 24/7 maintenance.

WHY CHOOSE SPARKLYN INFOTECH?

- **Tailored Solutions:** No cookie-cutter templates; every application is engineered around your specific business workflow.
- **Modern Tech Stacks:** We build using modern, battle-tested frameworks ensuring high performance and longevity.
- **Transparent Execution:** Direct communication, frequent sprint updates, and dedicated post-launch support.
